EXPERIENCE

Inversion Capital

Remote

Software Engineer Intern

Sep. 2025 – Feb. 2026

- Shipped a stablecoin remittance platform (Next.js / PostgreSQL) utilizing Bridge for on/off-ramps and wallet transfers, reducing USD-MXN txn time by **1-3 days** and fees **80%** while delivering a Venmo-like UX.
- Led R&D on Avalanche subnet **EVM** infrastructure; built a devnet from genesis, including precompile and wrapper contracts in Solidity / Hardhat and tooling integrations across Privy, Turnkey, Blockscout, etc.

Autoplay AI

Paris, France

Full Stack/AI Engineer (\$2.1m Pre-Seed)

Apr. 2025 – Aug. 2025

- Successfully launched** an AI-driven session replay-analytics dashboard in Next.js / FastAPI / PostgreSQL, enabling five design-partners to spot user-hesitation hot-spots and halve feedback cycles.
- Co-designed an end-to-end **machine learning** pipeline that clusters **50 K+** session replays using **K-means**, converting raw rrweb into actionable user insights in minutes.
- Led the development** of a RAG engine combining application tutorials and documentation to enrich LLMs with expert context – boosting AI analysis **accuracy** by 40%.

WJD Fund

Jacksonville, FL

Software Engineer Intern

June 2024 – Aug. 2024

- Deployed a **scalable** multi-threaded trading system in Python integrated with TradeStation's Web API, **managing \$1.2M** in assets and executing positions up to **\$5M**.
- Developed Futures strategies to be concurrently executed on this system - improved monthly returns by 7% and generated **\$50 K+ gross profit**.

Black Knight, Inc.

Jacksonville, FL

Frontend Engineer Intern (Awarded Intern Champion)

May 2023 – Aug. 2023

- Applied **Agile software development methodology** to efficiently roll out **features** to *Servicing Digital* (10 M monthly users) with Angular, improving the **user experience** throughout the **project lifecycle**.

EDUCATION

University of Florida

Gainesville, FL

Bachelor of Science in Computer Science, Master of Science in Finance

Aug. 2022 – May. 2026

- Honors and Involvement:** ColorStack, Association for Computing Machinery, University Research Scholars Program, University Honors Program
- Relevant Coursework:** Algorithm Abstraction, Data Structures + Algorithms, Linear Algebra, Operating Systems, Differential Equations

PROJECTS

FischGPT - PyTorch, NextJS, Express.js

- A GPT-2-class language model from first principles – wrote custom BPE tokenizer, multi-head attention, back-prop & soft-max layers and trained **end-to-end** with DDP on 8x A100s.
- Scaled** pre-training to 45B tokens (FineWeb 10B, 4.5 epochs) and followed with 25M-token SFT (OpenAsst1) – surpassing GPT-2's HellaSwag benchmark by **over 5%** and reducing validation loss by 0.3.
- Built a **RAG** pipeline in Express.js + ChromaDB to autogenerate “about-me” answers and shipped a web application in Next.js / ShadCN / Tailwind where users can chat live with the model (visit here).

PROGRAMMING SKILLS

- Programming Languages:** Python, TypeScript, C++, JavaScript, Dart, Java, SQL
- AI Techniques & Tools:** PyTorch, Transformers, RAG, MCP, ChromaDB, Pinecone, Numpy, Pandas
- Frameworks & Tools:** React, Next.js, FastAPI, Express.js, Flutter, GCP, ShadCN, Tanstack, Tailwind
